

DESCRIPTION

11km mountain trail that runs along the south side of Jaizkibel. Suitable for walking tour, but it is recommended to people accustomed to long-distance. Despite having some steep at the start, the route becomes more friendly from km 2. Wonderful panoramic views and items of cultural and historical interest are also appreciated.

Total elevation gain	1042m
Time	3h30min
Level	Medium
Distance	11km

1.1

XOXOLURRA PARK

In the Iparragirre stream and its surroundings, ancient human activity remains can be found. Remains of a dam from an ancient mill in Goikoerrotxa. A lime furnace still standing and some other limestone quarries in Karobieta, the old road used for going to get wood or leaf litter.

1.2

IPARRAGIRRE WATER TANK

Waters from Lezo come from the Jaizkibel mountain and from the Añarbe reservoir. The Iparragirre water tank was built in 1915, and it's the oldest of the municipality. With a capacity of 220 cubic meters, was also the largest until the construction of the Arriandi water tank. It's situated near the old walls of the Iparragirre's country house.

2.1

LORBIDE CARTER ROAD

The carter road which goes from the Olarzar countryhouse to the Sarasti's quarry is very old; in some sections we can see large stone slabs like the ones used in ancient times. Through this road oak logs used to be transported for the naval construction. In one of its highest points we can find the ruins of the Lorbide country house.

1.4

AMEZTI COUNTRY HOUSE

The little country house of Amezti dates back from the 19th century. Its main activity has always been grazing, a building deeply rooted to the Jaizkibel mountain since prehistoric times. Sheep provide great quality products: Cheese, milk, animal skin, wool and meat, among other things.

1.3

TORREAZPI WELL

In 2011, the Lezo's university council, with the help of the department of environment, territorial planning, agriculture and fishing from the Basque Country, created this small wetland in an area of little marshlands, with the goal of receiving amphibians, birds and aquatic insects.
